INDEX TO VOLUME 6, 1949

Subjects dealt with under various headings in the JOURNAL are set out both in the main Index and under their respective headings—for example 'Abstracts,' 'Book Reviews.' Names of authors of original articles are included in the Index. There is a separate Index to Abstracts. Names of authors of articles abstracted are separately listed.

Original Articles are indicated by the letter (O); Abstracts by the letter (A); and Book Reviews and British and Foreign Official Publications by the letter (R).

		Pages			Pages
No. 1.	January	1–64	No. 3.	July	125–212
No. 2.	April	65–124	No. 4.	October	213–280

A

Abrasives, synthetic, pneumoconiosis from, 202 (A)
Absence, sickness, due to peptic ulcers (RICHARD DOLL and M. M. BUCKATSZCH), 100 (O)
Accumulator industry, punctate basophilia in, 265 (A)
Adipic nitrile, intoxication with, 197 (A)
Aerosols, studies on, 53, 204, 205, 268 (A)
AGATE, JOHN N.; An outbreak of cases of Raynaud's phenomenon of occupational origin, 144 (O)
Air, bacterial contamination in living quarters, 56 (A)
Air-borne particulates in the human lung, 116 (A)
Alloys, hard, production of, 196 (A)
Alpha-active dust in atmosphere, measurement of, 117 (A)
Altitude, consciousness at, 267 (A)
———, flying at high, 113 (A)
———, pressure breathing at high, 199 (A)
Alumina abrasives, exposure to, 115 (A)
Aluminium dust, 114, 115 (A)
———— lung, a new disease, 53 (A)
———— therapy in silicosis, 202 (A)
Amines, tertiary alkalyl, 197 (A)
2-Aminodiazine, response of animals to, 49 (A)
2-Aminothiazole, response of animals to, 49 (A)
2-Amino-4-methyl pyrimidine, response of animals to, 49 (A)
Ammonium compounds as sanitizers, 58 (A)
Argyrosis, experimental, 196 (A)
———, problems of, 51 (A)
Artificial silk factory, carbon disulphide poisoning in, 198 (A)
Asbestosis, carcinoma in, 203 (A)
———, necropsies in, 268 (A)
Association of Industrial Medical Officers, 61, 121, 208, 272
Atmospheric pressures, fluctuating (F. P. ELLIS), 24 (O)
Auditoria, hygiene in, 206 (A)
AYLWARD, MARY (and C. N. DAVIES); Photoelectric measurement of coal dust stains on filter paper, 254 (O)
Azo dyes, sensitivity to, 55 (A)

B

Bacterial contamination of air in living quarters, 56 (A)
Bacterium coli in soil, 119 (A)
Bagassosis, *Aerobacter cloacæ* and, 115 (A)
Bakers and millers, allergic examination of, 271 (A)
BAL, in acute iron poisoning, 262 (A)
——, in lead acetate poisoning, 107 (A)
—— and uranium nitrate, 108 (A)
Barium salts, intoxication with, 196 (A)
Bauxite, fume exposure in manufacture of alumina abrasives from, 115 (A)
Benzene exposure, 111 (A)
γ- Benzene hexachloride in clothing, toxicity of, 59 (A)
Beryllium compounds, skin lesions from, 117 (A)
———, environmental studies in plants etc., 262 (A)
———, pneumonitis etc., due to, 55, 116, 201 (A)
———— poisoning, pathological anatomy, 262 (A)
Blastomycosis, granulomatous moniliasis resembling, 269 (A)
Blood flow, rates of, 200 (A)
Book Reviews:
Archives de l'Institut de Médecine Légale et de Médecine Sociale de Lille, 45
Précis de toxicologie (KOHN-ABREST, U.), 45
Silicosis pneumoconiosis and dust suppression in mines, 46
Textbook of the rheumatic diseases (COPEMAN, W. S. C.), 46
Demonstrations of physical signs in clinical surgery. Part 2 (BAILEY, HAMILTON), 46
Basic principles of ventilation and heating (BEDFORD, THOMAS), 103
Lehrbuch der Arbeitshygiene (KOELSCH, FRANZ), 103
History of factory and mine hygiene (TELEKY, LUDWIG), 104
Radon: its technique and use (JENNINGS, W. A., and RUSS, S.), 104
Transactions of the Ophthalmological Society of the United Kingdom, 1946, 104
Short history of ophthalmology (SORSBY, ARNOLD), 105
Demonstrations of physical signs in clinical surgery. Part 4 (BAILEY, HAMILTON), 194
Some common psychosomatic manifestations (MURRAY, J. BARRIE), 194
Welfare in industry (Ed. BLAYNEY THOMAS, F. J.), 261
Brickworks, health and environmental conditions in (G. F. KEATINGE and N. M. POTTER), 31 (O)
British and Foreign Official Publications:
Pilot error: some laboratory experiments (DAVIS, D. RUSSELL), 47
Central mining—Rand Mines Group. Report for 1947 (ORENSTEIN, A.J.), 47
Legislación sobre seguridad e higiene del trabajo, 48
Industrial fluorosis, 105
Interim index of industrial production, 195
Medical *x*-ray protection up to two million volts, 259
Brucellosis in industry, 207 (A)
BUCKATSZCH, M. M. (and RICHARD DOLL): Sickness absence due to peptic ulcers, 100 (O)

C

Cancer and asbestosis, 203 (A)
——— in chromate-producing industry, 114 (A)
——— of skin, sunlight and, 204 (A)
———, spinner's, of lower lip, 117 (A)
Carbon bisulphide, pathology of, 109 (A)
Carbon disulphide, studies on, 198 (A)
Carbon monoxide asyphixia, 264 (A)
——— ————, detection and exposure, 109, 110 (A)
——— ————, elimination from blood, 264 (A)
——— ———— poisoning, cerebral changes in, 51 (A)
——— tetrachloride, liver and, 109, 264 (A)
Carcinogenesis, chemical (I. HIEGER), 1 (O)
Cemented tungsten carbide industry, industrial hygiene aspects of, 55 (A)
Cetrimide (CTAB), skin sensitivity to (C. N. D. CRUICKSHANK, and J. R. SQUIRE), 164 (O)
Chemical compounds, vesical tumours induced by (M. W. GOLDBLATT), 65 (O)
Chills, subnormal temperature and, 112 (A)
China biscuit placing, calcined alumina in, 115 (A)
Chromate-producing industry, cancer in, 114 (A)
Chrome plating, mist control in, 60 (A)
Climate, effect on blood pressure, 200 (A)
Coal dust stains, photoelectric measurement of (C. N. DAVIES and MARY AYLWARD), 254 (O)
Coalminers' pneumoconiosis, the problem of consistent radiological diagnosis in (C. M. FLETCHER and P. D. OLDHAM), 168 (O)
Cockroaches, DDT for, 206 (A)
Cold, death from, 266 (A)
—— environments, resistance to, 266 (A)
—— wave solution, gangrene of skin from, 269 (A)
Compressed air, changes in joints due to, 266 (A)
Cosmetic industry, talc pneumoconiosis in, 54 (A)
CRUICKSHANK, C. N. D. (and J. R. SQUIRE); Skin sensitivity to cetrimide (CTAB), 164 (O)
Cryolite, toxicity for rats and rabbits, 50 (A)

D

DAVIES, C. N.; Inhalation risk and particle size in dust and mist, 245 (O)
——— (and MARY AYLWARD); Photoelectric measurement of coal dust stains on filter paper, 254 (O)
DAVIES, T. A. LLOYD (and H. E. HARDING); Manganese pneumonitis, 82 (O)
Dermatitis, contact, 269 (A)
———, pyrethrum, 55 (A)
Derris, occupational disease due to, 265 (A)
DDT, cockroach *Blatta orientalis* and, 206 (A)
———, domestic flies and, 206 (A)
———, exposure to, 48 (A)
———, mosquito control and, 59 (A)
———, pediculosis and, 206 (A)
———, phlebotomus and, 58 (A)
———, and DDD, toxicity of, 265 (A)
Dental conditions from exposure to hydrofluoric acid, 271 (A)
DOLL, RICHARD (and M. M. BUCKATSZCH); Sickness absence due to peptic ulcers, 100 (O)
Domestic rooms, factors affecting warmth, comfort, and stuffiness in, 57 (A)
DUNHAM, K. C. (and ENID ROGERS, and A. I. G. MCLAUGHLIN); Talc pneumoconiosis, 184 (O)
Dust, electron-microscopical studies of, 116 (A)
———, inhalation risk and particle size in (C. N. DAVIES), 245 (O)

E

Ear disease, infective, in factory employees, 270 (A)
Egg powder, *Salmonella* in, 120 (A)
ELLIS, F. P.; Fluctuating atmospheric pressures, 24 (O)
Ethylene glycol poisoning, 110 (A)
Exercise, heart rate and severe, 200 (A)
———, renal plasma flow and, 267 (A)

F

Fabrics, characteristics of, and heat load, 112 (A)
Factory and mine hygiene, history of, 104 (R)
Fatigue, meals and, 200 (A)
Fibrosis, pulmonary, 203 (A)
FLETCHER, C. M. (and P. D. OLDHAM); The problem of consistent radiological diagnosis in coalminers' pneumoconiosis, 168 (O)
Flies, and DDT, 206 (A)
Fluorophosphate vapours, toxicity of, 197 (A)
Fluorosis, industrial, 105 (R)
Food, frozen, survival of bacteria in, 119 (A)
——— supplements, effect on poorly fed workers, 52 (A)

G

GARRAD, JESSIE; Vital capacity measurements in Cornish tin-miners, 221 (O)
Germicidal soap, 208 (A)
Glass dust, fatal pneumonia from, 55 (A)
Glass-lined garments, comfort of, 112 (A)
GOLDBLATT, M. W.; Vesical tumours induced by chemical compounds, 65 (O)
Granulomatous moniliasis resembling blastomycosis, 269 (A)
Graphite, changes in the lungs produced by natural (H. E. HARDING and G. B. OLIVER), 91 (O)

H

Handicapped, job performance of, 270 (A)
Hands, infected, 270, 271 (A)
——— of radiologists, 208 (A)
HARDING, H. E. (and T. A. LLOYD DAVIES); Manganese pneumonitis, 82 (O)
——— (and G. B. OLIVER); Changes in the lungs produced by natural graphite, 91 (O)
Heat load, physiological, 112 (A)
———, performances in, 52, 200 (A)
Heating and ventilation, basic principles of, 103 (R)
Hemp, pneumoconiosis from, 201 (A)
γ-Hexachlorocyclohexane, treatment of poisoning by, 48 (A)
——— for ticks and moths, 60 (A)
HIEGER, I.; Chemical carcinogenesis, 1 (O)
Hydrazoic acid, observations on, 50 (A)
Hydrocarbons, aromatic, replacement of, 265 (A)
Hydrofluoric acid burns, 269 (A)
——— ———, dental conditions from exposure to, 271 (A)
Hydroquinone, corneal and conjunctival pigmentation from, 56 (A)
Hypoxia, effect on temperature regulation, 113 (A)

I

Industrial hygiene, textbook of, 103 (R)
Influenza vaccination in industry, 120 (A)
Inhalation risk and particle size in dust and mist (C. N. DAVIES), 245 (O)
Insecticides, 120, 207 (A)
Iron poisoning, BAL in, 262 (A)

J

Job performance of impaired persons, 270 (A)

K

KEATINGE, G. F. (and N. M. POTTER); Health and environmental conditions in brickworks, 31 (O)

L

Lacquer, skin reactions from Chinese, 116 (A)
LANE, RONALD E.; The care of the lead worker, 125 (O)
Lead poisoning, 49, 50, 107, 108, 195 (A)
——— worker, care of the (RONALD E. LANE), 125 (O)
Lille, Archives de l'Institut de Médecine Légale et de Médecine Sociale de, 45 (R)
Low temperatures, blood flow at, 199 (A)
——— ———, tolerance of man to, 52 (A)
Lungs, air-borne particulates in, 116 (A)
———, changes in, produced by natural graphite (H. E. HARDING and G. B. OLIVER), 91 (O)

M

MCLAUGHLIN, A. I. G. (and ENID ROGERS, and K. C. DUNHAM); Talc pneumoconiosis, 184 (O)
Manganese pneumonitis (T. A. LLOYD DAVIES and H. E. HARDING), 82 (O)
Meals, and fatigue, 200 (A)
Meat packers, Q fever in, 60 (A)
MEIKLEJOHN, A.: Silicosis in the potteries, 230 (O)
———: Silicosis in sandstone workers, 241 (O)
Mercurial tremor, treatment of, 111 (A)
Mercury, clothes contaminated by, 263 (A)
Metallic foreign bodies, late reactions to, 117 (A)
Methyl bromide poisoning, 110, 263 (A)
Methyl chloride intoxication, 263 (A)
"Micro-climate," standardization of an artificial, 57 (A)
Mine and factory hygiene, history of, 104 (R)
Mist, and dust, inhalation risk and particle size in (C. N. DAVIES), 245 (O)
Mosquito eradication campaigns, 59 (A)
Moths, repellents for, 60 (A)

N

Neoprene manufacture, hair loss in, 111 (A)
Neurological symptoms in silicosis, 203 (A)
Newspaper plants, lead exposure in, 108 (A)
Nitrogen mustard, industrial poisoning with, 264 (A)
——— oxide, determination in air, 206 (A)
Nuptiality, and mortality, 207 (A)
Nylon, blood changes in workers, 112 (A)
——— stocking dermatitis, 55 (A)

O

OLDHAM, P. D. (and C. M. FLETCHER); The problem of consistent radiological diagnosis in coalminers' pneumoconiosis, 168 (O)
OLIVER, G. B. (and H. E. HARDING); Changes in the lungs produced by natural graphite, 91 (O)
Ophthalmological Society of the United Kingdom, Transactions, 104 (R)
Ophthalmology, history of, 105 (R)
Ozocerite, mining of, 118 (A)

P

Partition coefficients of fifty compounds, 50 (A)
Pediculosis, DDT for, 206 (A)
Penicillin, for infected hands, 270 (A)
——— production plant, hygiene of, 206 (A)
Peptic ulcers, sickness absence due to (RICHARD DOLL and M. M. BUCKATSZCH), 100 (O)
Perfume industry, disturbance of smell in, 271 (A)
Petrolatum, sensitization to, 204 (A)
p-Phenylendiamine, sensitivity to, 55 (A)
Phlebotomus, control with DDT, 58 (A)
Phosgene, metabolism of lungs and, 204 (A)
——— poisoning, 110 (A)
Phosphorus in hygiene assessments of water, 118 (A)
Photoelectric measurement of coal dust stains on filter paper (C. N. DAVIES and MARY AYLWARD), 254 (O)

Physical signs in clinical surgery. Part 2, 46 (R)
———————— Part 4, 194 (R)
Pilot error, some laboratory experiments, 47 (R)
—— metabolism, 199 (A)
Pitch, skin lesions from, 204 (A)
Pneumoconiosis, of coalminers, 54, 114, 202 (A)
———————— (C. M. FLETCHER and P. D. OLDHAM), 168 (O)
———————— from hemp, 201 (A)
———————— from synthetic abrasives, 202 (A)
———————— from talc, 54 (A); (A. I. G. MCLAUGHLIN, ENID ROGERS, and K. C. DUNHAM), 184 (O)
————————, problem of consistent radiological diagnosis in (C. M. FLETCHER and P. D. OLDHAM), 168 (O)
———————— from tin oxide, 54 (A)
Pneumonia, fatal, from glass dust, 55 (A)
Pneumonitis, chemical, from beryllium compounds, 55, 116, 201 (A)
————————, manganese (T. A. LLOYD DAVIES and H. E. HARDING), 82 (O)
POTTER, N. M. (and G. F. KEATINGE); Health and environmental conditions in brickworks, 31 (O)
Potteries, silicosis in the (A. MEIKLEJOHN), 230 (O)
Pregnancy, effects of war on, 57 (A)
Pressure breathing at sea level, 267 (A)
Production, interim index of industrial, 195 (R)
Psychosomatic manifestations, some common, 194 (R)
Pyrethrum dermatitis, 55 (A)

Q

Q fever, studies on, 60 (A)

R

Radiation hazards, 108 (A)
Radiological diagnosis, consistent, in coalminers' pneumoconiosis (C. M. FLETCHER and P. D. OLDHAM), 168 (O)
Radiologists, hands of, 208 (A)
Radon, its technique and use, 104 (R)
Rand mines group; report for 1947, 47 (R)
Raynaud's phenomenon of occupational origin, an outbreak of, (JOHN N. AGATE), 144 (O)
Respiratory diseases, control of, 205 (A)
Rheumatic diseases, textbook of, 46 (R)
ROGERS, ENID (and A. I. G. MCLAUGHLIN, and K. C. DUNHAM); Talc pneumoconiosis, 184 (O)

S

Safety and hygiene of the workman, legislation on, 48 (R)
Salmonella in reconstituted egg powder, 120 (A)
Sandstone workers, silicosis in (A. MEIKLEJOHN), 241 (O)
Sanitization, quaternary ammonium compounds in, 58 (A)
Sarcoidosis, pulmonary, 203 (A)
Scotland, Weil's disease in north-east (J. SMITH), 213 (O)
Selenium burn of the eye, 56 (A)
————————, experimental intoxication, 263 (A)
Sickness absence due to peptic ulcers (RICHARD DOLL and M. M. BUCKATSZCH), 100 (O)
Siderosis, of welders, 54 (A)
Silicones, studies on, 203 (A)
Silicosis, 202, 203 (A)
————————, blood changes in, 268 (A)
————————, functional examination of respiration in, 268 (A)
————————, lesions of, 114 (A)
————————, pneumoconiosis and dust suppression in mines, 46 (R
————————, in the potteries (A. MEIKLEJOHN), 230 (O)
————————, the pulmonary hilum in, 54 (A)
———————— in sandstone workers (A. MEIKLEJOHN), 241 (O)
Skeletal muscle, pathology of, 50 (A)
Skin cancer, sunlight and, 204 (A)
——, gangrene of, from cold wave solution, 269 (A)
—— lesions from pitch and tar, 204 (A)
—— sensitivity to cetrimide (CTAB) (C. N. D. CRUICKSHANK and J. R. SQUIRE), 164 (O)
SMITH, J.; Weil's disease in the north-east of Scotland, 213 (O)
"Smog" in Los Angeles, 205 (A)
Smoke particles in air, determination of, 118 (A)
Sodium chlorate poisoning, 110 (A)
Sodium pyrocatechindisulphonate and lead poisoning, 107 (A)
Sodium thiomalate for mercurial tremor, 111 (A)
Spinner's cancer of lower lip, 117 (A)
SQUIRE, J. R. (and C. N. D. CRUICKSHANK); Skin sensitivity to cetrimide (CTAB), 164 (O)
Stannosis, 201 (A)
Submarines, a novel environmental variant observed in (F. P. ELLIS), 24 (O)
Sunlight and skin cancer, 204 (A)
Surgery, physical signs in clinical, 46, 194 (R)
Sweating, adrenergic component in, 112 (A)
————————, studies on, 55 (A)

T

Talc pneumoconiosis, 54 (A)
—— ———————— (A. I. G. MCLAUGHLIN, ENID ROGERS, and K. C. DUNHAM), 184 (O)
Tar, skin lesions from, 204 (A)
Thallium in urine, determination of, 262 (A)
Thermal exchanges of men in hot environments, 52 (A)
Thrombo-embolism, social and economic significance of, 58 (A)
Tick repellents, 59, 60 (A)
Tin oxide, pneumoconiosis due to, 54 (A)
Tin-miners, Cornish, vital capacity measurements in (JESSIE GARRAD), 221 (O)
Toxicology, summary of, 45 (R)
Tuberculosis, pulmonary, employment of persons with, 267 (A)
Tumours, vesical, induced by chemical compounds (M. W. GOLDBLATT), 65 (O)

U

Underground workers, ultra-violet irradiation of, 56 (A)
Uranium dioxide dust, toxicity, 196 (A)
———————— nitrate, toxic action, 108 (A)

V

Ventilation and heating, basic principles, 103 (R)
———————— of auditoria, 206 (A)
Vesical tumours induced by chemical compounds (M. W. GOLDBLATT), 65 (O)
Vibrations, effects of, 199, 200, 266 (A)
———————— ———————— (J. N. AGATE), 144 (O)
Visual performance, meals and, 200 (A)
Vital capacity measurements in Cornish tin-miners (JESSIE GARRAD), 221 (O)

W

War, effects on pregnancy, 57 (A)
Warmth, vasodilatation and, 199 (A)
Water, purification of, 118, 119 (A)
Weil's disease in the north-east of Scotland (J. SMITH), 213 (O)
Welders, pathological changes in, 59 (A)
————————, siderosis of, 54 (A)
Welfare in industry, 261 (R)

X

X-ray protection up to two million volts, 259 (R)

INDEX TO ABSTRACTS

A

Abrasives, synthetic, pneumoconiosis from, 202
Accumulator industry, punctate basophilia in, 265
Adipic nitrile, intoxication with, 197
Aerosols, studies on, 53, 204, 205, 268
Air, bacterial contamination in living quarters, 56
Air-borne particulates in the human lung, 116
Alloys, hard, production of, 196
Alpha-active dust in atmosphere, measurement of, 117
Altitude, consciousness at, 267
————, flying at high, 113
————, pressure breathing at high, 199
Alumina abrasives, exposure to, 115
Aluminium dust, 114, 115
———— lung, a new disease, 53
———— therapy in silicosis, 202
Amines, tertiary alkalyl, 197
2-Aminodiazine, response of animals to, 49
2-Aminothiazole, response of animals to, 49
2-Amino-4-methyl pyrimidine, response of animals to, 49
Ammonium compounds as sanitizers, 58
Argyrosis, experimental, 196
————, problems of, 51
Artificial silk factory, carbon disulphide poisoning in, 198
Asbestosis, carcinoma in, 203
————, necropsies in, 268
Auditoria, hygiene in, 206
Azo dyes, sensitivity to, 55

B

Bacterial contamination of air in living quarters, 56
Bacterium coli in soil, 119
Bagassosis, *Aerobacter cloacæ* and, 115
Bakers and millers, allergic examination of, 271
BAL, in acute iron poisoning, 262
—— in lead acetate poisoning, 107
—— and uranium nitrate, 108
Barium salts, intoxication with, 196
Bauxite, fume exposure in manufacture of alumina abrasives from, 115
Benzene exposure, 111
γ-Benzene hexachloride in clothing, toxicity of, 59
Beryllium compounds, skin lesions from, 117
————, environmental studies in plants etc., 262
———— pneumonitis etc. due to, 55, 116, 201
———— poisoning, pathological anatomy, 262
Blastomycosis, granulomatous moniliasis resembling, 269
Blood flow, rates of, 200
Brucellosis in industry, 207

C

Cancer and asbestosis, 203
———— in chromate-producing industry, 114
———— of skin, sunlight and, 204
————, spinner's, of lower lip, 117
Carbon bisulphide, pathology of, 109
———— disulphide, studies on, 198
———— monoxide asyphyxia, 264
———— ————, detection and exposure, 109, 110
———— ————, elimination from blood, 264
———— ———— poisoning, cerebral changes in, 51
———— tetrachloride, liver and, 109, 264
Cemented tungsten carbide industry, industrial hygiene aspects of, 55
Chills, subnormal temperature and, 112
China biscuit placing, calcined alumina in, 115
Chromate-producing industry, cancer in, 114
Chrome plating, mist control in, 60
Climate, effect on blood pressure, 200
Cockroaches, DDT for, 206
Cold, death from, 266
—— environments, resistance to, 266
—— wave solution, gangrene of skin from, 269
Compressed air, changes in joints due to, 266
Cosmetic industry, talc pneumoconiosis in, 54
Cryolite, toxicity for rats and rabbits, 50

D

Dermatitis, contact, 269
————, pyrethrum, 55
Derris, occupational disease due to, 265
DDT, Cockroach *Blatta orientalis* and, 206
——, domestic flies and, 206
——, exposure to, 48
——, mosquito control and, 59
——, pediculosis and, 206
——, phlebotomus and, 58
——, and DDD, toxicity of, 265
Dental conditions from exposure to hydrofluoric acid, 271
Domestic rooms, factors affecting warmth, comfort, and stuffiness, 57
Dust, electron-microscopical studies, 116

E

Ear disease, infective, in factory employees, 270
Egg powder, *Salmonella* in, 120
Ethylene glycol poisoning, 110
Exercise, heart rate and severe, 200
————, renal plasma flow and, 267

F

Fabrics, characteristics of, and heat load, 112
Fatigue, meals and, 200
Fibrosis, pulmonary, 203
Flies, and DDT, 206
Fluorophosphate vapours, toxicity of, 197
Food, frozen, survival of bacteria in, 119
—— supplements, effect on poorly fed workers, 52

G

Germicidal soap, 208
Glass dust, fatal pneumonia from, 55
Glass-lined garments, comfort of, 112
Granulomatous moniliasis resembling blastomycosis, 269

H

Handicapped, job performance of, 270
Hands, infected, 270, 271
Hands of radiologists, 208
Heat load, physiological, 112
——, performances in, 52, 200
Hemp, pneumoconiosis from, 201
γ-Hexachloro*cyclo*hexane, treatment of poisoning by, 48
———————— for ticks and moths, 60
Hydrazoic acid, observations on, 50
Hydrocarbons, aromatic, replacement of, 265
Hydrofluoric acid burns, 269
———————, dental conditions from exposure to, 271
Hydroquinone, corneal and conjunctival pigmentation from, 56
Hypoxia, effect on temperature regulation, 113

I

Influenza vaccination in industry, 120
Insecticides, 120, 207
Iron poisoning, BAL in, 262

J

Job performance of impaired persons, 270

L

Lacquer, skin reactions from Chinese, 116
Lead poisoning, 49, 50, 107, 108, 195
Low temperatures, blood flow at, 199
———————, tolerance of man to, 52
Lungs, air-borne particulates in, 116

M

Meals, and fatigue, 200
Meat packers, Q fever in, 60
Mercurial tremor, treatment, 111
Mercury, clothing contaminated by, 263
Metallic foreign bodies, late reactions to, 117
Methyl bromide poisoning, 110, 263
—— chloride intoxication, 263
"Micro-climate," standardization of an artificial, 57
Mosquito eradication campaigns, 59
Moths, repellents for, 60

N

Neoprene manufacture, hair loss in, 111
Neurological symptoms in silicosis, 203
Newspaper plants, lead exposure in, 108
Nitrogen mustard, industrial poisoning with, 264
———— oxide, determination in air, 206
Nuptiality, and mortality, 207
Nylon, blood changes in workers, 112
—— stocking dermatitis, 55

O

Ozocerite, mining of, 118

P

Partition coefficients of fifty compounds, 50
Pediculosis, DDT for, 206
Penicillin, for infected hands, 270
———— production plant, hygiene of, 206
Perfume industry, disturbance of smell in, 271
Petrolatum, sensitization to, 204
p-Phenylendiamine, sensitivity to, 55
Phlebotomus, control with DDT, 58
Phosgene, metabolism of lungs and, 204
———— poisoning, 110
Phosphorus in hygiene assessments of water, 118
Pilot metabolism, 199
Pitch, skin lesions from, 204
Pneumoconiosis, of coalminers, 54, 114, 202
———————— from hemp, 201
———————— from synthetic abrasives, 202
———————— from talc, 54
———————— from tin oxide, 54
Pneumonia, fatal, from glass dust, 55
Pneumonitis, chemical, from beryllium compounds, 55, 116, 201
Pregnancy, effects of war on, 57
Pressure breathing at sea level, 267
Pyrethrum dermatitis, 55

Q

Q fever, studies on, 60

R

Radiation hazards, 108
Radiologists, hands of, 208
Respiratory diseases, control of, 205

S

Salmonella in reconstituted egg powder, 120
Sanitization, quaternary ammonium compounds in, 58
Sarcoidosis, pulmonary, 203
Selenium burn of the eye, 56
————, experimental intoxication, 263
Siderosis, of welders, 54
Silicones, studies on, 203
Silicosis, 202, 203
————, blood changes in, 268
————, functional examination of respiration in, 268
————, lesions of, 114
————, the pulmonary hilum in, 54
Skeletal muscle, pathology of, 50
Skin cancer, sunlight and, 204
——, gangrene of, from cold wave solution, 269
—— lesions from pitch and tar, 204
"Smog" in Los Angeles, 205
Smoke particles in air, determination of, 118
Sodium chlorate poisoning, 110
Sodium pyrocatechindisulphonate and lead poisoning, 107
Sodium thiomalate for mercurial tremor, 111
Spinner's cancer of lower lip, 117
Stannosis, 201
Sunlight and skin cancer, 204
Sweating, adrenergic component in, 112
————, studies on, 55

T

Talc pneumoconiosis, 54
Tar, skin lesions from, 204
Thallium in urine, determination of, 262
Thermal exchanges of men in hot environments, 52
Thrombo-embolism, social and economic significance of, 58
Tick repellents, 59, 60
Tin oxide, pneumoconiosis due to, 54
Tuberculosis, pulmonary, employment of persons with, 267

U

Underground workers, ultra-violet irradiation of, 56
Uranium dioxide dust, toxicity, 196
———— nitrate, toxic action, 108

V

Ventilation of auditoria, 206
Vibrations, effects of, 199, 200, 266
Visual performance, meals and, 200

W

War, effects on pregancy, 57
Warmth, vasodilatation and, 199
Water, purification of, 118, 119
Welders, pathological changes in, 59
———— siderosis of, 54
